Lectures on Differential Galois Theory (University Lecture Series) Andy R. Magid

Differential Galois theory studies solutions of differential equations over a differential base field. In much the same way that ordinary Galois theory is the theory of field extensions generated by solutions of (one variable) polynomial equations, differential Galois theory looks at the nature of the differential field extension generated by the solutions of differential equations. An additional feature is that the corresponding differential Galois groups (of automorphisms of the extension fixing the base and commuting with the derivation) are algebraic groups. This book deals with the differential Galois theory of linear homogeneous differential equations, whose differential Galois groups are algebraic matrix groups. In addition to providing a convenient path to Galois theory, this approach also leads to the constructive solution of the inverse problem of differential Galois theory for various classes of algebraic groups. Providing a self-contained development and many explicit examples, this book provides a unique approach to differential Galois theory and is suitable as a textbook at the advanced graduate level.

From reader reviews:

Kathy Hunnicutt:

Information is provisions for people to get better life, information today can get by anyone from everywhere. The information can be a understanding or any news even a problem. What people must be consider whenever those information which is in the former life are challenging to be find than now's taking seriously which one works to believe or which one typically the resource are convinced. If you get the unstable resource then you get it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take Lectures on Differential Galois Theory (University Lecture Series) as the daily resource information.

Adrienne McGinnis:

Do you really one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer can be Lectures on Differential Galois Theory (University Lecture Series) why because the fantastic cover that make you consider regarding the content will not disappoint a person. The inside or content is usually fantastic as the outside or maybe cover. Your reading sixth sense will directly guide you to pick up this book.

Charlotte Kuester:

Are you kind of active person, only have 10 as well as 15 minute in your moment to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short time to read it because this time you only find guide that need more time to be examine. Lectures on Differential Galois Theory (University Lecture Series) can be your answer given it can be read by an individual who have those short free time problems.

Linda Porter:

You will get this Lectures on Differential Galois Theory (University Lecture Series) by browse the bookstore or Mall. Simply viewing or reviewing it could to be your solve issue if you get difficulties for your knowledge. Kinds of this publication are various. Not only by written or printed but can you enjoy this book by means of e-book. In the modern era like now, you just looking from your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose right ways for you.
