Numerical Analysis: Historical Developments in the 20th Century

Numerical analysis has witnessed many significant developments in the 20th century. This book brings together 16 papers dealing with historical developments, survey papers and papers on recent trends in selected areas of numerical analysis, such as: approximation and interpolation, solution of linear systems and eigenvalue problems, iterative methods, quadrature rules, solution of ordinary- partial- and integral equations. The papers are reprinted from the 7-volume project of the Journal of Computational and Applied Mathematics on homepage/sac/cam/na2000/index.html Numerical Analysis 2000. An introductory survey paper deals with the history of the first courses on numerical analysis in several countries and with the landmarks in the development of important algorithms and concepts in the field.
