Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) Eric Wikramanayake, Eric Dinerstein, Colby J. Loucks

"This book, along with its companions in this series, takes an ecoregional approach, dividing large regions into small, distinct units, each with its characteristic species, ecosystems, natural history, and threats. As such, it has no peers. It is the sourcebook for anyone who must look for where and how to act to save the variety of life on Earth." --from the foreword by Stuart L. Pimm

A number of conservation groups, including World Wildlife Fund, have in recent years adopted an approach to conservation that uses ecoregions to identify biological and conservation priority areas. Ecoregions define distinct ecosystems that share broadly similar environmental conditions and natural communities; as such, they make more sense for priority-setting efforts than do political units such as countries or provinces.

Terrestrial Ecoregions of the Indo-Pacific offers a comprehensive examination of the state of the Indo-Pacific's biodiversity and habitats, moving beyond endangered or charismatic species to quantify for the first time the number of mammal and bird species, including endemics, in each ecoregion.

The book begins with a discussion of the background and basis for ecoregion delineation and definition of the objectives and approach used. Following that, chapters describe the biological distinctiveness and conservation status of ecoregions, quantifying the amount of habitat remaining, how it is distributed, and how much is protected. The analysis concludes with a set of ecoregions that deserve immediate attention and also highlights ecoregions that are still in relatively pristine condition. Substantial appendixes offer detailed descriptions of each ecoregion, including information on:

- unique features of the ecoregion that set it apart from others
- its biological distinctiveness, threats to habitats and wildlife, and important sites for conservation
- an agenda and recommendations for where conservation efforts should be concentrated

Short essays by regional experts -- including Derek Holmes, Tony Whitten, Indraneil Das, Walter Erdelen, John Seidensticker, Joyotee Smith, Kathy MacKinnon, and others -- address special topics relating to finer-scale conservation issues or ecological processes that are typically overlooked in a regional-scale analysis.

From reader reviews:

Paul Holt:

As people who live in often the modest era should be update about what going on or data even knowledge to make these keep up with the era which is always change and progress. Some of you maybe can update themselves by looking at books. It is a good choice for you but the problems coming to anyone is you don't know what kind you should start with. This Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Harold Riggs:

The event that you get from Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) may be the more deep you searching the information that hide in the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) giving you thrill feeling of reading. The copy writer conveys their point in a number of way that can be understood by simply anyone who read it because the author of this reserve is well-known enough. This particular book also makes your own personal vocabulary increase well. Making it easy to understand then can go together with you, both in printed or e-book style are available. We suggest you for having this Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) instantly.

Michael Watkins:

This Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) are usually reliable for you who want to be considered a successful person, why. The reason why of this Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) can be one of many great books you must have is usually giving you more than just simple examining food but feed a person with information that probably will shock your preceding knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions in the e-book and printed versions. Beside that this Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) forcing you to have an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day action. So , let's have it and enjoy reading.

Kelley Hardy:

Beside this particular Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) in your phone, it might give you a way to get nearer to the new

knowledge or facts. The information and the knowledge you are going to get here is fresh from oven so don't become worry if you feel like an old people live in narrow commune. It is good thing to have Terrestrial Ecoregions of the Indo-Pacific: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) because this book offers for your requirements readable information. Do you sometimes have book but you don't get what it's all about. Oh come on, that would not happen if you have this in your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss it? Find this book and also read it from now!
