The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture Don Cummings, Robert Dalrymple, Kyungsik Choi, Jaehwa Jin

The Tide-Dominated Han River Delta provides a thorough analysis of a river delta in which tidal currents have reworked the river-borne sediment, generating characteristic geomorphological and sedimentological signatures in the process. Such "tide-dominated" deltas are common in the modern ocean, forming the substrate upon which entire populations are built. Furthermore, ancient examples contain enormous volumes of hydrocarbon. Despite this, tide-dominated deltas remain less well understood than their wave- and river-dominated counterparts, largely because processes within them are inherently more complex and fewer modern examples have been investigated in detail.

This multi-year study by a team of experts in coastal geoscience represents the most complete documentation of a tide-dominated delta to date. Results help advance, and are applicable to, a broad range of fields within sedimentary geology, including clastic sedimentology, seismic and sequence stratigraphy, and coastal geomorphology, in addition to petroleum geology and reservoir engineering.

- Offers new access to results of a multi-year hydrocarbon-reservoir analogue study not available elsewhere.
- Features 75 full-color figures and illustrations to emphasize critical aspects of the delta's sedimentology, geomorphology, and stratigraphy.
- Provides basic data that better define what tide-dominated deltas are, how these complex systems behave over time, and why this is so.
- Aids petroleum geologists and reservoir engineers in predicting the distribution of baffles and barriers in tide-dominated sediment bodies, helping in the successful development of reservoirs.

From reader reviews:

Jose Gould:

This The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture are generally reliable for you who want to be a successful person, why. The reason of this The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture can be among the great books you must have is giving you more than just simple studying food but feed you actually with information that possibly will shock your earlier knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed people. Beside that this The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture forcing you to have an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day exercise. So , let's have it and luxuriate in reading.

Brooks Davis:

A lot of people always spent all their free time to vacation or maybe go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity this is look different you can read some sort of book. It is really fun for you. If you enjoy the book you read you can spent all day long to reading a guide. The book The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture it is extremely good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. When you did not have enough space to create this book you can buy the e-book. You can m0ore easily to read this book out of your smart phone. The price is not very costly but this book features high quality.

Ronnie Correa:

In this particular era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple way to have that. What you are related is just spending your time almost no but quite enough to possess a look at some books. One of the books in the top collection in your reading list is definitely The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture. This book and that is qualified as The Hungry Hillside can get you closer in turning into precious person. By looking way up and review this guide you can get many advantages.

Clara Williams:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is created or printed or created from each source this filled update of news. In

this particular modern era like today, many ways to get information are available for an individual. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the The Tide-Dominated Han River Delta, Korea: Geomorphology, Sedimentology, and Stratigraphic Architecture when you necessary it?
