Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) Anindya Banerjee, Juan Dolado, J. W. Galbraith, David Hendry

This book is wide-ranging in its account of literature on cointegration and the modelling of integrated processes (those which accumulate the effects of past shocks). Data series which display integrated behavior are common in economics, although techniques appropriate to analyzing such data are relatively new, with few existing expositions of the literature. This book explores relationships among integrated data series and their use in dynamic econometric modelling. The concepts of cointegration and error-correction models are fundamental components of the modelling strategy. This area of time series econometrics has grown in importance over the past decade and is of interest to both econometric theorists and applied econometricians. By explaining the important concepts informally and presenting them formally, the book bridges the gap between purely descriptive and purely theoretical accounts of the literature. The work describes the asymptotic theory of integrated processes and uses the tools provided by this theory to develop the distributions of estimators and test statistics. It emphasizes practical modelling advice and the use of techniques for systems estimation. A knowledge of econometrics, statistics, and matrix algebra at the level of a final-year undergraduate or first-year undergraduate course in econometrics is sufficient for most of the book. Other mathematical tools are described as they occur.

About the Series

Advanced Texts in Econometrics is a distinguished and rapidly expanding series in which leading econometricians assess recent developments in such areas as stochastic probability, panel and time series data analysis, modeling, and cointegration. In both hardback and affordable paperback, each volume explains the nature and applicability of a topic in greater depth than possible in introductory textbooks or single journal articles. Each definitive work is formatted to be as accessible and convenient for those who are not familiar with the detailed primary literature.

From reader reviews:

Sarita Springer:

This Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this e-book incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. This kind of Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) without we know teach the one who studying it become critical in thinking and analyzing. Don't end up being worry Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) can bring when you are and not make your tote space or bookshelves' grow to be full because you can have it in your lovely laptop even phone. This Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) having fine arrangement in word and layout, so you will not experience uninterested in reading.

Ann Tuttle:

In this particular era which is the greater person or who has ability to do something more are more precious than other. Do you want to become one among it? It is just simple method to have that. What you are related is just spending your time not very much but quite enough to have a look at some books. One of the books in the top checklist in your reading list is definitely Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics). This book which is qualified as The Hungry Hillside can get you closer in turning into precious person. By looking upward and review this book you can get many advantages.

Tony Caldwell:

As we know that book is significant thing to add our understanding for everything. By a reserve we can know everything we would like. A book is a list of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This book Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) was filled regarding science. Spend your free time to add your knowledge about your technology competence. Some people has various feel when they reading the book. If you know how big advantage of a book, you can sense enjoy to read a guide. In the modern era like today, many ways to get book which you wanted.

Cheryl Burnett:

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the educator want, like asked to the library. They go to at this time there but

nothing reading significantly. Any students feel that examining is not important, boring and also can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Co-integration, Error Correction, and the Econometric Analysis of Non-Stationary Data (Advanced Texts in Econometrics) can make you sense more interested to read.
