The benchmark of scientific reference since the days of Einstein, Eddington, and Planck, no book is held to a higher standard than the **Handbook of Chemistry and Physics**. Perpetually vetted for misspellings, miscalculations, misperceptions, and misnomers, it is republished every year, so no mistake needs to be long abided, no enhancement long awaited.

The job of editing the **Handbook** requires not only one who is relentless, driven to perpetually push the level of accuracy one more decimal point, but also one who is humble enough and smart enough to understand that the **Handbook**, like science itself, is a living, changing thing, and that it is both a record of achievement and a foundation for further improvement of that record. Until this year, the **Handbook** has been guided through 90 editions by just four editors. The last, David Lide, guided the book through 20 editions. Perhaps most importantly, Dr. Lide guided the **Handbook** into the electronic age, overseeing the creation and the continual improvement of interactive web and CD versions that have now become staples in every research library of note.
