**Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education)** Penny J. Gilmer

One aim of Gilmer's captivating text on university pedagogy is to show that biochemistry (or any science) does not consist solely of facts to be learned, but is a way of thinking about the world. Her purpose, both in this book and in her classroom, is to make her students into critical thinkers rather than passive learners. The chapters cast a critical eye over research into enhanced education techniques such as collaborative learning. Gilmer describes the action research she conducted in her own biochemistry undergraduate classroom into ways of improving the learning environment. She offers various perspectives on the make-up of her classroom, including an analysis of ethnographic data.

The tools Gilmer employs as she hones her teaching skills include collaborative learning and technology. She views the classroom through various theoretical perspectives: social constructivism, cultural-historical activity theory, and a theory that involves the dialectic between the structure of the learning environment and the agency of the learners (a group among whom she includes herself). She provides a wealth of autobiographical detail as well as the results of her action research, which followed up on its original subjects after an interval of 11 years, to see what impact her course had on their professional growth. Above all, this volume is proof of what can be achieved in education when teachers are as interested in the process of learning as they are in their subject itself.

**From reader reviews:**

**Nancy Martindale:**

Throughout other case, little persons like to read book Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education). You can choose the best book if you'd prefer reading a book. So long as we know about how is important a book Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education). You can add understanding and of course you can around the world by a book. Absolutely right, because from book you can realize everything! From your country till foreign or abroad you will be known. About simple factor until wonderful thing you could know that. In this era, we could open a book or even searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's examine.

**Martina White:**

This Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) are generally reliable for you who want to be a successful person, why. The key reason why of this Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) can be on the list of great books you must have will be giving you more than just simple reading through food but feed you with information that probably will shock your preceding knowledge. This book is handy, you can bring it all over the place and whenever your conditions throughout the e-book and printed people. Beside that this Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) giving you an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we know it useful in your day activity. So , let's have it and enjoy reading.

**Lee Henry:**

Your reading 6th sense will not betray anyone, why because this Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) guide written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written within good manner for you, leaking every ideas and creating skill only for eliminate your own hunger then you still hesitation Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) as good book not only by the cover but also by content. This is one publication that can break don't evaluate book by its protect, so do you still needing another sixth sense to pick this specific!?! Oh come on your reading sixth sense already told you so why you have to listening to another sixth sense.

**Dale Randolph:**

Beside this specific Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) in your phone, it may give you a way to get closer to the new knowledge or data. The information and the knowledge you will get here is fresh through the oven so don't possibly be worry if you feel like an outdated people live in narrow town. It is good thing to have Transforming University Biochemistry Teaching Using Collaborative Learning and Technology: Ready, Set, Action Research! (Contemporary Trends and Issues in Science Education) because this book offers to your account readable information. Do you at times have book but you would not get what it's facts concerning. Oh come on, that won't happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. Use you still want to miss that? Find this book and also read it from at this point!
