Green's Functions with Applications Dean G. Duffy

Since its introduction in 1828, using Green's functions has become a fundamental mathematical technique for solving boundary value problems. Most treatments, however, focus on its theory and classical applications in physics rather than the practical means of finding Green's functions for applications in engineering and the sciences.

Green's Functions with Applications systematically presents the various methods of deriving these useful functions. It leads readers through the process of developing Green's functions for ordinary and partial differential equations. In addition to exploring the classical problems involving the wave, heat, and Helmholtz equations, the book includes special sections on leaky modes, water waves, and absolute/convective instability.

The author gives special attention to the numerical evaluation of Green's functions. By illustrating many of the functions in the text and problem sets, he helps readers develop an intuition about the behavior of Green's function in certain problems. He also considers the questions of the computational efficiency and possible methods for accelerating the process.

With its wealth of examples and problems drawn from the literature, this book provides a treasure-trove of methods to construct and compute Green's functions. It is the most exhaustive source book of Green's functions yet available and the only one designed specifically for engineering and scientific applications.

From reader reviews:

Adam Jones:

The ability that you get from Green's Functions with Applications is the more deep you excavating the information that hide inside the words the more you get thinking about reading it. It does not mean that this book is hard to be aware of but Green's Functions with Applications giving you buzz feeling of reading. The writer conveys their point in particular way that can be understood by simply anyone who read this because the author of this guide is well-known enough. This specific book also makes your vocabulary increase well. That makes it easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this kind of Green's Functions with Applications instantly.

Stephen Louis:

Information is provisions for folks to get better life, information presently can get by anyone on everywhere. The information can be a know-how or any news even an issue. What people must be consider when those information which is inside the former life are hard to be find than now's taking seriously which one would work to believe or which one typically the resource are convinced. If you receive the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Green's Functions with Applications as the daily resource information.

Jacob Smith:

People live in this new day of lifestyle always try and and must have the spare time or they will get large amount of stress from both lifestyle and work. So , once we ask do people have free time, we will say absolutely indeed. People is human not just a robot. Then we request again, what kind of activity are there when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative in spending your spare time, the particular book you have read is usually Green's Functions with Applications.

Allen Grimm:

Many people spending their period by playing outside together with friends, fun activity using family or just watching TV the entire day. You can have new activity to pay your whole day by reading through a book. Ugh, do you think reading a book can really hard because you have to use the book everywhere? It alright you can have the e-book, having everywhere you want in your Cell phone. Like Green's Functions with Applications which is having the e-book version. So , why not try out this book? Let's notice.
