## Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

Going beyond performing simple analyses, researchers involved in the highly dynamic field of computational intelligent data analysis design algorithms that solve increasingly complex data problems in changing environments, including economic, environmental, and social data. **Computational Intelligent Data Analysis for Sustainable Development** presents novel methodologies for automatically processing these types of data to support rational decision making for sustainable development. Through numerous case studies and applications, it illustrates important data analysis methods, including mathematical optimization, machine learning, signal processing, and temporal and spatial analysis, for quantifying and describing sustainable development problems.

With a focus on integrated sustainability analysis, the book presents a large-scale quadratic programming algorithm to expand high-resolution input-output tables from the national scale to the multinational scale to measure the carbon footprint of the entire trade supply chain. It also quantifies the error or dispersion between different reclassification and aggregation schemas, revealing that aggregation errors have a high concentration over specific regions and sectors.

The book summarizes the latest contributions of the data analysis community to climate change research. A profuse amount of climate data of various types is available, providing a rich and fertile playground for future data mining and machine learning research. The book also pays special attention to several critical challenges in the science of climate extremes that are not handled by the current generation of climate models. It discusses potential conceptual and methodological directions to build a close integration between physical understanding, or physics-based modeling, and data-driven insights.

The book then covers the conservation of species and ecologically valuable land. A case study on the Pennsylvania Dirt and Gravel Roads Program demonstrates that multiple-objective linear programming is a more versatile and efficient approach than the widely used benefit targeting selection process.

Moving on to renewable energy and the need for smart grids, the book explores how the ongoing transformation to a sustainable energy system of renewable sources leads to a paradigm shift from demand-driven generation to generation-driven demand. It shows how to maximize renewable energy as electricity by building a supergrid or mixing renewable sources with demand management and storage. It also presents intelligent data analysis for real-time detection of disruptive events from power system frequency data collected using an existing Internet-based frequency monitoring network as well as evaluates a set of computationally intelligent techniques for long-term wind resource assessment.

In addition, the book gives an example of how temporal and spatial data analysis tools are used to gather knowledge about behavioral data and address important social problems such as criminal offenses. It also

applies constraint logic programming to a planning problem: the environmental and social impact assessment of the regional energy plan of the Emilia-Romagna region of Italy.

Sustainable development problems, such as global warming, resource shortages, global species loss, and pollution, push researchers to create powerful data analysis approaches that analysts can then use to gain insight into these issues to support rational decision making. This volume shows both the data analysis and sustainable development communities how to use intelligent data analysis tools to address practical problems and encourages researchers to develop better methods.

### **From reader reviews:**

#### **Paul Norris:**

The book Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was compiled by the very famous author. Mcdougal makes some research previous to write this book. This specific book very easy to read you may get the point easily after scanning this book.

#### **Marcus Laws:**

Do you have something that that suits you such as book? The reserve lovers usually prefer to pick book like comic, small story and the biggest the first is novel. Now, why not striving Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) that give your satisfaction preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the opportunity for people to know world a great deal better then how they react towards the world. It can't be stated constantly that reading behavior only for the geeky person but for all of you who wants to become success person. So , for every you who want to start reading through as your good habit, it is possible to pick Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) become your own starter.

#### **Walter Reeves:**

Reading a book to become new life style in this 12 months; every people loves to learn a book. When you learn a book you can get a lot of benefit. When you read books, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, such us novel, comics, and also soon. The Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) will give you new experience in studying a book.

#### **Ronald Johnson:**

A lot of people said that they feel weary when they reading a e-book. They are directly felt the item when they get a half portions of the book. You can choose typically the book Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) to make your personal reading is interesting. Your current skill of reading talent is developing when you such as reading. Try to choose easy book to make you enjoy to learn it and mingle the sensation about book and looking at especially. It is to be first opinion for you to like to open up a book and go through it. Beside that the guide Computational Intelligent Data Analysis for Sustainable Development (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) can to be your brand new friend when you're feel

alone and confuse using what must you're doing of these time.
