## FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology)

*FIB Nanostructures* reviews a range of methods, including milling, etching, deposition, and implantation, applied to manipulate structures at the nanoscale. Focused Ion Beam (FIB) is an important tool for manipulating the structure of materials at the nanoscale, and substantially extends the range of possible applications of nanofabrication. FIB techniques are widely used in the semiconductor industry and in materials research for deposition and ablation, including the fabrication of nanostructures such as nanowires, nanotubes, nanoneedles, graphene sheets, quantum dots, etc. The main objective of this book is to create a platform for knowledge sharing and dissemination of the latest advances in novel areas of FIB for nanostructures and related materials and devices, and to provide a comprehensive introduction to the field and directions for further research. Chapters written by leading scientists throughout the world create a fundamental bridge between focused ion beam and nanotechnology that is intended to stimulate readers' interest in developing new types of nanostructures for application to semiconductor technology. These applications are increasingly important for the future development of materials science, energy technology, and electronic devices. The book can be recommended for physics, electrical engineering, and materials science departments as a reference on materials science and device design.

### **From reader reviews:**

#### **Neil Calvert:**

The book FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology) make you feel enjoy for your spare time. You may use to make your capable considerably more increase. Book can to be your best friend when you getting pressure or having big problem using your subject. If you can make studying a book FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology) for being your habit, you can get far more advantages, like add your capable, increase your knowledge about several or all subjects. You are able to know everything if you like open up and read a reserve FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology). Kinds of book are several. It means that, science book or encyclopedia or other people. So , how do you think about this guide?

#### **Jason Braden:**

As people who live in the modest era should be change about what going on or data even knowledge to make these individuals keep up with the era which can be always change and make progress. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to anyone is you don't know which one you should start with. This FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology) is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

#### **Helen Richards:**

Reserve is one of source of expertise. We can add our knowledge from it. Not only for students but in addition native or citizen have to have book to know the change information of year to be able to year. As we know those ebooks have many advantages. Beside we add our knowledge, may also bring us to around the world. By book FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology) we can acquire more advantage. Don't someone to be creative people? To be creative person must choose to read a book. Merely choose the best book that ideal with your aim. Don't end up being doubt to change your life with that book FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology). You can more desirable than now.

#### **Ashley Johnson:**

Reading a guide make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is published or printed or descriptive from each source in which filled update of news. Within this modern era like now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just searching for the FIB Nanostructures (Lecture Notes in Nanoscale Science and Technology) when you needed it?
