Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering) Ajit Kumar Verma, Srividya Ajit, Manoj Kumar

The measurement of dependability attributes on real systems is a very time-consuming and costly affair, making analytical or simulation modeling the only viable solutions. *Dependability of Networked Computer-based Systems* explores reliability, availability and safety modeling of networked computer-based systems used in life-critical applications such as avionics, nuclear power plants, automobiles and chemical process industries.

Dependability of Networked Computer-based Systems gives an overview of basic dependability modeling concepts and addresses new challenges in dependability modeling of networked computer-based systems, as well as new trends, their capabilities and limitations. It covers a variety of dependability modeling methods:

- stochastic processes,
- Markov and semi-Markov models,
- response-time distribution,
- stochastic Petri-net-based modeling formalisms, and
- Monte Carlo simulation models.

Dependability of Networked Computer-based Systems provides students and researchers with a detailed overview of dependability models and analysis techniques. Practicing engineers will also find this text a useful guide to decision-making based on system dependability at the design, operation and maintenance stages.

From reader reviews:

Susan Romero:

This book untitled Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering) to be one of several books this best seller in this year, that's because when you read this book you can get a lot of benefit into it. You will easily to buy this kind of book in the book store or you can order it by using online. The publisher of this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smartphone. So there is no reason to you personally to past this publication from your list.

Dennis Simpson:

Do you have something that that suits you such as book? The reserve lovers usually prefer to pick book like comic, short story and the biggest you are novel. Now, why not attempting Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering) that give your enjoyment preference will be satisfied through reading this book. Reading behavior all over the world can be said as the opportunity for people to know world a great deal better then how they react in the direction of the world. It can't be mentioned constantly that reading behavior only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start studying as your good habit, you could pick Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering) become your own starter.

Lisa Christopher:

Are you kind of stressful person, only have 10 or 15 minute in your day time to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are having problem with the book as compared to can satisfy your limited time to read it because this time you only find book that need more time to be examine. Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering) can be your answer since it can be read by a person who have those short extra time problems.

Fred Garza:

Publication is one of source of expertise. We can add our information from it. Not only for students and also native or citizen want book to know the upgrade information of year in order to year. As we know those books have many advantages. Beside all of us add our knowledge, can bring us to around the world. Through the book Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering) we can acquire more advantage. Don't someone to be creative people? To get creative person must want to read a book. Only choose the best book that ideal with your aim. Don't possibly be doubt to change your life by this book Dependability of Networked Computer-based Systems (Springer Series in Reliability Engineering). You can more attractive than now.
