Drug Delivery Systems: Advanced Technologies Potentially Applicable in Personalised Treatment (Advances in Predictive, Preventive and Personalised Medicine)

Drug Delivery Systems: Advanced Technologies Potentially Applicable in Personalised Treatment (Advances in Predictive, Preventive and Personalised Medicine)

This book is part of a series dedicated to recent advances on preventive, predictive and personalised medicine (PPPM). It focuses on the theme of “Drug delivery systems: advanced technologies potentially applicable in personalised treatments”. The critical topics involving the development and preparation of effective drug delivery systems, such as: polymers available, self-assembly, nanotechnology, pharmaceutical formulations, three dimensional structures, molecular modeling, tailor-made solutions and technological tendencies, are carefully discussed. The understanding of these areas constitutes a paramount route to establish personalised and effective solutions for specific diseases and individuals.
