Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes

Bradley Cantrell, Natalie Yates

A single-source guide to harnessing the power of 3D visualization tools for analysis and representation of landscapes

Current technology allows designers to model environmental phenomena and space in new and exciting ways that go beyond the two-dimensional plane. The models, illustrations, and animations that can be created usher in a new paradigm of landscape representation that can become analytical tools as well as beautiful imagery. The text focuses on digital modeling methods that can be used to express rich environments using digital tools to develop, composite, and animate scenes.

This full-color book provides coverage of 3D visualization tools for land planning and landscape architecture. The methods and theories in *Modeling the Environment* present landscape representation around a core set of ideas—scene, object, terrain, environment/atmosphere, time/dynamics, and the composite—that centers representation on human experience. Supported by www.lab.visual-logic.com, a website offering tutorials and forums, the text shows you how to use Autodesk 3ds Max to create dynamic landscape environments while also referring to a range of other tools including Google SketchUp, Autodesk Maya, and AutoCAD Civil 3D. It also demonstrates how to integrate 3D visualization tools into existing workflows, and offers critical coverage of intelligent drawings and representations, giving you a glimpse at the future of the profession. This book:

- Includes sections intended to build upon one another in order to understand the environment as a composite representation of multiple systems interacting
- Shows how to integrate 3D visualization tools into existing workflows, as opposed to offering an entirely new workflow
- Emphasizes modeling, animation, and simulation as both design analysis tools and presentation tools

Modeling the Environment is essential reading for professionals in landscape architecture, urban planning and design, architecture, and related disciplines who are looking to be at the forefront of technology.

From reader reviews:

Dorothy Tran:

Nowadays reading books become more than want or need but also work as a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The details you get based on what kind of guide you read, if you want drive more knowledge just go with education and learning books but if you want feel happy read one with theme for entertaining including comic or novel. Often the Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes is kind of reserve which is giving the reader unpredictable experience.

Kathleen Strickland:

Reading a reserve can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new facts. When you read a e-book you will get new information due to the fact book is one of various ways to share the information or their idea. Second, looking at a book will make a person more imaginative. When you reading a book especially tale fantasy book the author will bring you to definitely imagine the story how the people do it anything. Third, you are able to share your knowledge to other people. When you read this Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes, you may tells your family, friends as well as soon about yours guide. Your knowledge can inspire different ones, make them reading a publication.

Janice Saucier:

The book untitled Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes is the e-book that recommended to you you just read. You can see the quality of the book content that will be shown to you actually. The language that creator use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, and so the information that they share to you personally is absolutely accurate. You also can get the e-book of Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes from the publisher to make you far more enjoy free time.

Martha Dixon:

Many people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half elements of the book. You can choose the book Modeling the Environment: Techniques and Tools for the 3D Illustration of Dynamic Landscapes to make your reading is interesting. Your current skill of reading skill is developing when you like reading. Try to choose straightforward book to make you enjoy to read it and mingle the sensation about book and examining especially. It is to be very first opinion for you to like to open a book and read it. Beside that the guide Modeling the Environment: Techniques and Tools for

the 3D Illustration of Dynamic Landscapes can to be your friend when you're feel alone and confuse with the information must you're doing of their time.
